DETAILED ACTION

Preliminary matter

Examiner's immediate supervisor has instructed examination such that claims must not rely on imported description/specification in an internal Office electronic mail messages dated August 8, 2006 and August 2, 2006 to the examiner. Claims must contain all specification discussion as clarified by examiner's supervisor. Furthermore, language such as "for powdered or granular material," or "inclinable relative" is to be interpreted as desired result and ordered examination such that the invention should be claimed as means or step plus function format, based on an internal Office electronic mail message dated July 10, 2006. The rejections to follow are based on mandated policies by examiner's immediate supervisor, with contact information at the end of this action.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 and 4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Wolens (US 3,567,139).

Claim Rejections - 35 USC § 103

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wolens in view of Thompson et al. (US 3,313,629). Wolens is considered to disclose the claimed invention, as rejected above, except for the claimed flexible hose. Thompson, another drying apparatus, is considered to disclose a flexible hose at column 5 lines 49-68. It would have been obvious to one skilled in the art to combine the teachings of Wolens, with the flexible hose, considered disclosed in Thompson, for the purpose of allowing detachably connected material transport for greater operability and efficiency.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 3749

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-12 of copending Application No. 10/539,887. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to one skilled in the art to not include the present application claimed electric heater since the copending application would perform the invention as claimed with or without and electric heater.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
